

CiNET is web based Construction Industry Information System. CiNET is designed to provide information related to Construction Industry available on internet for the procuring agencies who are engaged in Construction activities. Information like work in hand of contractor's, their past track record and performance, human recourse employed, equipments owned can be accessed by the Procuring Agencies.

It is also a plat form where procuring agencies can post their NIT/IFB advertisement and post tender documents on CDB website, which serves as One Window Service for all NIT's for the contractors.

As required by CDB manual Bidding and Contract Completion Report Forms are also made available on CiNET so the respective agency can fill in the forms online and submit to CDB Secretariat.
